Official EU Law Links Directory

Compliance content on the web is often paraphrased or out of date. When a decision matters, go back to the official instrument. This directory maps each major topic to its regulation or directive number and tells you where the authoritative source sits. EUR-Lex hosts the official legal texts, while the EU Safety Gate lists product recalls and alerts.

Instrument numbers identify the original acts; many are later amended or supplemented. Always read the consolidated version on EUR-Lex (eur-lex.europa.eu) before relying on a provision.
